

Candidate: Josef S.

Personality description

My name is Josef, I am 22 years old, I live in a small village called Chrást (it's near Plzeň - the European capital city of culture 2015) in Czech Republic. I study at University of West Bohemia, the faculty of economics and I live by Eurovision and its songs every single day. I recognized Eurovision first sometimes around 2004 after Ruslana has won with Wild Dances. This song was huge hit and people talked about it (with this song, the articles also mentioned Céline Dion and ABBA as one of the most successful participants through Eurovision history). Then I got to Eurovision with Czech debut in 2007 and I've been fan of Eurovision since then. I also watch the national finals since 2011 and it was the time when I became fully implemented into the selection process and everything about ESC. I am just an ordinary guy who loves music (singing, playing the clarinet and listening music) and reading (mostly detective stories, fantasy and sci-fi), his boyfriend, TV series, reality shows, films and the nature (I love walking in the forest etc.). If I enjoy something, I am fully occupied by that and in that case I am quite responsible person. Especially when it comes to the deadlines. :D

"Why should you be part of the EM FC Committee?"

One of the possible answers is: "Why not?" :D But I would rather say that after 10 editions now and few editions in the beginning of EM, I know this contest quite good, I also know the people who are participating and therefore I could be useful. I also participate in few other contests so I could know that certain song is from another country than the one who submitted and therefore it couldn't be used in EM etc.

Optional question: "How can you improve the Eurovision Memories Song Contest?"

Well in my opinion EM is almost perfect and there isn't so many things to be improved. Yes, one of the possible ways to improve EM is to get more people participating so we would have more songs and maybe once again 3 semifinals. :) The second idea is that we should create new and exciting special editions so as it's not the job for EM FC, we should share our ideas and thoughts with Ross and Márcio. Last but not least, we could try to prepare EM logos in the most creative way and try to motivate our participants to take part in creating these logos.
